Braking System Automotive
Brake Systems

Most modern cars have brakes on all four wheels, operated by a hydraulic system . The brakes may be disc type or drum type. The front brakes play a greater part in

File Type PDF Automotive Brake Systems

stopping the car than the rear ones, because braking throws the car weight forward on to the front wheels. Many cars therefore have disc brakes , which are generally more efficient, at the front and drum brakes at

File Type PDF Automotive Brake Systems

the rear.
