The Canadian Electrical Code requires that "essential" receptacles in hospitals, connected to emergency power systems, must be red. At least one manufacturer makes a yellow receptacle, which identifies it as corrosion-resistant. Break-away tabs. Most duplex receptacles have metal tabs connecting the top and bottom receptacles.

A vehicle identification
number, VIN, is a unique
code used to identify each
vehicle produced by the
automotive industry. VINs
were standardized in 1981 to
contain 17 characters, not
including the letters i, o,
and q. The first few digits
identify the world
manufacturer. The 4th to 8th
digits identify the vehicle
attributes.
