Crocodiles (subfamily

Crocodylinae) or true

crocodiles are large

semiaquatic reptiles that

live throughout the tropics

in Africa, Asia, the

Americas and Australia.

Crocodylinae, all of whose

members are considered true

crocodiles, is classified as

a biological subfamily. A

broader sense of the term

### **Crocodile - Wikipedia**

Crocodiles are the largest and the heaviest of present-day reptiles. The largest representatives, the Nile crocodile (*Crocodylus niloticus*) of Africa and the estuarine (or saltwater) crocodile (*C. porosus*) of Australia, attain lengths of up to 6 metres (20 feet) and weigh over 1,000 kg (about 2,200 pounds).

Crocodiles. The crocodile order (Crocodylia) consists of several families of large, unmistakable, amphibious reptiles: the crocodiles (Crocodylidae), gavials (Gavialidae), and the alligators and caimans (Alligatoridae). Although these animals look superficially like lizards, they are different in many important respects, and are believed by biologists to be the most highly evolved of the living ...

Crocodiles can also be seen sunning with their mouths open, or "gaping." This behavior is also related to regulating their body temperature, and does not mean that the crocodile is acting aggressively toward people. The diet of the American crocodiles primarily consists of small mammals, birds, frogs, turtles, and fish (Fishman et al. 2009).
