As it stands, the batch file's only output is a date in D/M/YY format (or DD/MM/YY if you have added any leading characters). This will work as a standalone batch file or as a function tacked onto the end of your own batch file and executed with a CALL statement. As an external function, you might CALL it from within your own batch file like this:

Advanced Batch File Programming: YESTERDAY.BAT | Experts **A batch file is a script file in DOS, OS/2 and Microsoft Windows. It consists of a series of commands to be executed by the command-line interpreter, stored in a plain text file. A batch file may contain any command the interpreter accepts interactively and use constructs that enable conditional branching and looping within the batch file, such as IF, FOR, and GOTO labels. The term "batch" is from batch processing, meaning "non-interactive execution", though a batch file may not process a batch**
