This book describes the history, present status and possible future models of clinical legal education (CLE) in 12 Asian jurisdictions: China, Hong Kong, India, Palestine, Singapore, Thailand, Turkey, Israel, Japan, Taiwan, Maldives, and South Korea. Contributors use case studies from each country to show that while CLE in Asia could initially have been described as an Anglo-Western style of legal education teaching, it has evolved past that framework. While it remains in an early development stage, CLE throughout Asia has both incorporated the core values established by traditional Western legal education theorists and developed its own Asian characteristics. Conclusions drawn from this important research have great utility for those involved with legal clinics across the globe.

Almost a century ago Vassar professor Lucy Maynard Salmon (1853-1927) started down an intellectual path that made her one of the most innovative historians of all time. Her historical method relied on extensive use of the documents of everyday life. In class, for example, she surprised her students with laundry lists, grocery receipts, and newspapers, and asked them to interpret these "ephemera" as historical documents. What did the laundry receipts tell about those who used such services? About those who ran such establishments? About systems of domestic service? Business organization? In short, Salmon recentered history from narrative to methodology, from story to apparatus. By examining subjects that we associate with material culture she anticipated current practices by decades. Salmon was modern in her concerns and her methods, and a feminist in both her interests and her approach. The book contains a cross-section of her essays, including selections from her ground-breaking study "Domestic Service" and her well-known essays "History in a Back Yard" and "Main Street" in which she reads the everyday environment of garden and city in historical terms. Also included are her remarkable essay on the architectural organization of her kitchen and a hitherto unpublished essay on her former professor, Woodrow Wilson, that describes him in vivid terms as an "autophotographer." Salmon's modernism will startle those who have not read her before.

"Do what you can to help your children's imaginations to grow and flourish - encourage activities which feed their imaginations" Sir Ken Robinson, 2008. This quotation inspired the authors to think about sharing their life-long collection of tried and true creativity activities and resources. Their engaging and provoking book, The Creativity Crusade, is a result of these efforts. It provides the strategies and mindsets needed to nurture and protect children's creativity! The book begins with questions for parents to ponder: What are the most important elements that should be included in your child's education to prepare them for the future? How much longer can America hold on to its innovative status with the testing culture that currently exists in our classrooms? What role can you, as a parent, play in nurturing and supporting your child's creativity? The authors provide innovative - practical - researched-based - suggestions from both their classroom and parenting experiences. Rest assured, the activities, methods and tools presented in this book will give you the confidence and knowledge to start making a difference in how your children experience life, learning and happiness. And finally, the authors invite you to join their Creativity Crusade for every child, every parent, every grandparent, every home, EVERY DAY! "This book is refreshing. I know schools cannot be expected to take charge of fostering creativity in children and teenagers anytime soon. Parents own this responsibility. This whole idea intrigues me. I'm reading this with a highlighter and sticky notes."

Red Soil and Roasted Maize is a selection of Kenyan writer Rasna Warah's most poignant, introspective and satirical articles, columns and essays that provide snapshots and analyses of events that have shaped Kenya's lives and dreams in the last decade, from the turbulent transition to democracy in 2002 to a flawed election in 2007 that had a deep impact on Kenya's political, economic and social landscape. She candidly deciphers and describes the perils of growing ethnic chauvinism and corruption in an increasingly polarised nation and examines her own life as a writer in one of Africa's most diverse and unequal societies.
