Problem solving consists of using generic or ad hoc methods in an orderly manner to find solutions to problems. Some of the problem-solving techniques developed and used in philosophy, artificial intelligence, computer science, engineering, mathematics, medicine and societies in general are related to mental problem-solving techniques studied in psychology and cognitive sciences

Problem solving - Wikipedia

The 15 puzzle (also called Gem Puzzle, Boss Puzzle, Game of Fifteen, Mystic Square and many others) is a sliding puzzle having 15 square tiles numbered 1–15 in a frame that is 4 tiles high and 4 tiles wide, leaving one unoccupied tile position. Tiles in the same row or column of the open position can be moved by sliding them horizontally or vertically, respectively.

15 puzzle - Wikipedia

Kuhn ' s own demarcation criterion is the capability of puzzle-solving that he sees as an essential characteristic of normal science. Kuhn ' s view of demarcation is most clearly expressed in his comparison of astronomy with astrology. Since antiquity, astronomy has been a puzzle-solving activity and therefore a science.

Stripe Press — Ideas for progress

Kuhn describes normal science as ' puzzle-solving ' (1962/1970a, 35–42). While this term suggests that normal science is not dramatic, its main purpose is to convey the idea that like someone doing a crossword puzzle or a chess problem or a jigsaw, the puzzle-solver expects to have a reasonable chance of solving the puzzle, that his doing ...

By putting these factors down on paper in this simple format, you can quickly spot pitfalls and opportunities to guide you in your problem-solving process. PEST analysis. The PEST analysis is another tool that lends itself to visual mapping for decision-making. The acronym stands for Political, Economic, Social, Technology.

Global Supply Chain Institute

The political decision maker is interested in power and influence and views people and/or property as divided into groups that have different value. The religious decision maker seeks to identify with a larger purpose, works to unify others under that goal, and commits to a viewpoint, often denying one side and being dedicated to the other.

14.3 Problem Solving and Decision Making in Groups ...

To desert the paradigm is to cease practicing the science it defines (34). Chapter IV - Normal Science as Puzzle-solving. Doing research is essentially like solving a puzzle. Puzzles have rules. Puzzles generally have predetermined solutions. A striking feature of doing research is that the aim is to discover what is known in advance.

Kuhn's Structure of Scientific Revolutions - outline

Problem solving is a signature attribute of adult humans, but we need to understand how this develops in children. Tool use is proposed as an ideal way to study problem solving in children less than 3 years of age because overt manual action can reveal how the child plans to achieve a goal. Motor errors are as informative as successful actions. Research is reviewed on intentional actions ...

Power lives in relationships, not in people. Given the complexity of group interaction, it ' s short-sighted to try to understand group communication without looking at notions of power.Power influences how we interpret the messages of others and determines the extent to which we feel we have the right to speak up and voice our concerns and opinions to others.
