The Mating Mind: How Sexual Choice
Shaped the Evolution of Human Nature
(2000) Buy it on Amazon . Description
"At once a pioneering study of evolution
and an accessible and lively read, The
Mating Mind offers the most convincing --
and radical -- explanation to date for how
and why the human mind evolved.

Human sexual activity, human sexual practice or human sexual behaviour is the manner in which humans experience and express their sexuality. People engage in a variety of sexual acts, ranging from activities done alone (e.g., masturbation) to acts with another person (e.g., sexual intercourse, non-penetrative sex, oral sex, etc.) in varying patterns of frequency, for a

Mating systems vary considerably across animals and explaining this variation is a fundamental task for evolutionary ecologists, so I can't necessarily give a conclusive answer to this. In animals we normally refer to a number of different systems; "polygyny" (where males mate with multiple females), "polyandry" (where females mate ...
